- Data Structures and Algorithms, Theory of Computation, Operating Systems, Python with Data Science, Computer Networks, Database Management Systems, Object-oriented programming, Internet of Things.

PROJECTS

Spotify Clone — [GitHub](#)

Jan 2024

- In my Spotify clone project, I concentrated on the front-end development using **HTML** and **CSS**, aiming to recreate the familiar interface of the popular music streaming platform.
- While the project doesn't include responsive design, it faithfully mirrors Spotify's layout and features. Every element, from the navigation bar to the playlist display, is carefully crafted to provide users with an immersive experience akin to the real thing.

Portfolio Website — [GitHub](#) — [link](#)

Mar 2024

- My personal portfolio website built using **HTML**, **CSS**, and **JavaScript** is a showcase of my skills, projects, and experiences. It offers visitors an intuitive and visually appealing platform to explore my background and accomplishments in software development.
- Comprehensive representation of My Skills, Experiences, and Projects. A dedicated section showcases my projects, highlighting their features, technologies used, and my contributions.

Flipkart Clone — [GitHub](#)

Feb 2024

- In my Flipkart clone project, I focused on replicating the fundamental layout and structure of the original website using **HTML** and **CSS**.
- Although the project does not incorporate responsive design, it closely mimics the core elements and functionalities of the renowned e-commerce platform.
- From the navigation menu to the product display grid, every aspect of the layout is carefully crafted to mirror the familiar browsing experience of Flipkart.

CERTIFICATE

- CLASS TOP 10 CERTIFICATE
I secured 9th rank in daily attendance (5th semester).
- CLASS TOP 10 CERTIFICATE
I secured 8th rank in viva and practical (3rd semester).
